A fun and entertaining game. Doesnt need much thinking lol. Graphics are great and the music is mysterious. though steam achievements havent worked yet for me if you like steam achievements. <https://www.youtube.com/watch?v=JPGPFSeGOU4>. If you have nothing to do, it's okay to click away on it. The music however gets annoying REALLY fast. The graphics are okay-ish, nothing special about it. The annoying thing is that there are no settings in-game, no game modes or anything that would make the game remotely interesting. Just clicking and dragging blobs on your screen..
